Original Software

"Quality is never an accident, it is always the result of intelligent effort" — John Ruskin

'How to' guides

These easy to use guides show how to perform a variety of tasks in step-by-step detail. Plenty to choose from covering all our products. Titles already published include, 'Converting IE scripts to Chromium', 'Hosted Jira' and Integrating TestDrive with more being added all the time. Take a look at the full range here.

Webinar:
Scrap the spreadsheet and up your UAT efficiency
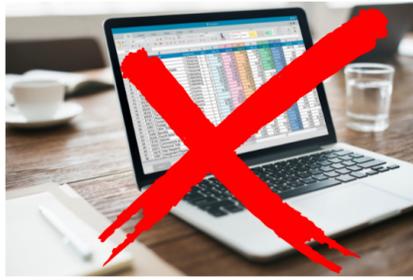

Register for the webinar

We are running a series of no nonsense half-hour webinars taking place on the last Wednesday of every month. September's topic is "Scrap the spreadsheet and up your UAT game" on Wednesday 29th September. Register your place here. If you missed August's webinar "*The road to test automation*" you can watch the on-demand recording here.

Staff News

We're delighted to welcome Carl Andrews who joined us in August as Head of Sales. A keen skier and faithful supporter of Derby County football club, Carl also coaches local teams Hatton United and the Littleover Dazzlers in his spare time.
Jonathan Pearson known to many of you already, has recently moved into a Product Manager role. His passion for enabling customers to break new boundaries with our product suite will be invaluable as we continue to drive our product capabilities forward.

Customer Forum - coming soon

We are planning a customer forum in the Autumn or Fall (for our US colleagues). More details and dates to follow. If you have a story to share with your fellow users, or have a topic you would enjoy debating in a workshop, then please let us know.

Vermont Information Processing

Vermont Information Processing (VIP) has been providing business solutions to beverage wholesalers since 1972. With the help of Original Software solutions and a much more robust approach to software quality, VIP has completely turned around its QA process. The company has now transformed into a software testing centre of excellence with happy customers keen to upgrade to new releases.
