

Infor Testing

Whether you're on-premise or running CloudSuite, our comprehensive testing platform allows you to test your business processes across Infor and any integrated app. We can help you handle your Infor updates with ease, reducing defect resolution time and risk in your business.

How our solution can help...

-  **Reduce bugs, reduce risk**
Identify every software change, whether expected or not. Comprehensive test capture speeds up bug resolution so you can go live with confidence.
-  **No code, non-technical software**
Your system users hold the knowledge, so use them! Our platform is code-free and user-friendly which means you can get up and running in minutes.
-  **Test every process end-to-end**
Your tech stack isn't limited to just Infor. That's why our solution is built to work across Infor and any integrated application whether cloud, on-premise or even green screen.
-  **Speed up your testing cycles**
Quick and easy test capture, a central place to organise and see your testing, with smart, automated features that combine to chop your testing time in half.
-  **Test evidence at your fingertips**
Peace of mind from having proof of testing with rich, full audit trails, to satisfy stakeholder requirements and help you meet regulatory compliance for quality.

Proudly working with

Why us?

Original Software has been helping businesses step into the future of testing and deliver quality software for over 25 years through a range of code-free testing solutions.

Over the past 10 years, we've become the go-to testing partner on Infor's Marketplace working with Infor ERP customers in the cloud, on-premise, or running over IBM i.

Join the happiest customers in testing

"Zero defects reach production"
"Hundreds of man hours saved"
"Sleep easy the night before go-live"
"We've halved our testing time"

Solution in action

With over 2,000 test cases and a major Infor M3 upgrade across 6 countries looming, Valmet needed to improve the speed and the quality of their testing and project management. Working with Original Software, they were able to speed up defect reporting and halve their testing time during this critical pan-european upgrade.

[Read the full case study here...](#)

"Originally we had planned for 3 months to test the M3 upgrade in 6 countries. With these tools we have cut that time in half and saved 3 - 4,000 hours."

Nadja Westen - Global ERP owner

Our solutions

TEST MANAGEMENT

Complete application quality management from planning to deployment in a unified view

PROCESS DOCUMENTATION

Automatic screen and process capture that aids training, documentation and automation

MANUAL TESTING

Scripted and exploratory testing that captures every step for faster defect resolution

TEST AUTOMATION

Rapid, AI-powered, 100% code-free test automation across any application

USER ACCEPTANCE TESTING

End-to-end, any platform testing for business users that halves UAT time

IBM i TESTING

An advanced, privacy-compliant data creation and maintenance solution for the IBM i
